## The Knú Feel of Comfort

*More than the repose offered by a soft place to rest, Comfort can take meaning in every aspect of our world. It is a force to heal a troubled body, mind, and soul. And it is our passion.*

Comfort is designed and built into everything that comes out of our doors. It's the foundation of what we strive to create, and what we offer to those who most need it. Our ethos. From the initial spark that flashes through the mind of one of our dedicated engineers to the first time a new design leaves any one of our manufacturing facilities, Comfort is the guiding light that carries us through every step of the way.

With the arrival of a new day comes the onset of fresh challenges, innovative ideas, and previously unconsidered needs. This showcase of our newly released offerings combines a few strategically improved redesigns of some of our most popular seating options, along with brand new products that offer functionality to expand the capabilities of our patient room collections.

Our Kadia Mod Visitor Seating brings a modern, architectural design to our public area collections, with the addition of molded seat foam to bring new dimensions of Comfort. The three position Kure Recliner has been modified to provide a more comfortable experience and mobility. We've also added a tapered wood leg option to

our Kascade Lounge family, which adds a modern flair to one of our more popular lounge series. Lastly our Max Sleep Sofa Collection has added another highly functional configuration, a hydraulic lifting table in the center for dining, games, or any other need.

Culminating years of development, we are excited to release our Lift Exam Series of Recliners, available in both manual and power variations. While our recliner category has always been second to none in the availability of options to suit a vast spectrum of healthcare needs, the addition of the ability to raise a patient to exam height for treatment or examination makes our offering more versatile than ever. In a setting where space comes at a premium, the ability for one product to be used as a recliner, a sleep space with true flatbed recline, or an exam table at the press of a pedal makes it a choice of true value.

As we look onward, we hope you are able to see and feel the Comfort engineered into every product being offered, and you are able to experience the performance and durability that are foundational to what we make and who we are.
