The Knú Feel of Comfort

More than the repose offered by a soft place to rest, Comfort can take meaning in every aspect of our world. It is a force to heal a troubled body, mind, and soul. And it is our passion.

Comfort is designed and built into everything that comes out of our doors. It's the foundation of what we strive to create, and what we offer to those who most need it. Our ethos. From the initial spark that flashes through the mind of one of our dedicated engineers to the first time a new design leaves any one of our manufacturing facilities, Comfort is the guiding light that carries us through every step of the way.

With the arrival of a new day comes the onset of fresh challenges, innovative ideas, and previously unconsidered needs. This showcase of our newly released offerings combines a few strategically improved redesigns of some of our most popular seating options, along with brand new products that offer functionality to expand the capabilities of our patient room collections.

Our Kadia Mod Visitor, Hip, and Upholstered Lounge brings a modern, architectural design to our public area collections, bringing new dimensions of Comfort across several applications. This aesthetic has been expanded into our recliner and sleep chair lines as new styles of our longstanding and most popular products.

The all-new Kadia Luxe recliner further innovates with a clean look and clever design, engineered to hide the standard folding table and recliner operational gear within its sleek profile.

Culminating years of development, we are excited to release our Lift Exam Series of Recliners, available in both manual and power variations. While our recliner category has always been second to none in the availability of options to suit a vast spectrum of healthcare needs, the addition of the ability to raise a patient to exam height for treatment or examination makes our offering more versatile than ever. In a setting where space comes at a premium, the ability for one product to be used as a recliner, a sleep space with true flatbed recline, or an exam table at the press of a pedal makes it a choice of true value.

As we look onward, we hope you are able to see and feel the Comfort engineered into every product being offered, and you are able to experience the performance and durability that are foundational to what we make and who we are.

Kadia Luxe Durable® 650 Series Recliner » **KLC1117TQ.**

Recessed Folding Side Tray and Optional Thermofoil Arm Cap

Optional Chaise Continuous Leg Support

Kadia Luxe Recliner

The Kadia Luxe Durable® 650 Series Recliner combines the 'engine' of our flagship healthcare recliner with an innovative front profile design crafted to hide the operational levers and included table within the body of the piece, all while offering the same functionality and unitized movement of our premier recliner series.

The goals when developing the Luxe recliner version of our popular Kadia family of product were to integrate all functional pedals and levers within the arm body sides of the recliner, to reduce snag points and mitigate damage to the patient room, the doorways, as well as the recliner itself. The Kadia Luxe recliner also incorporates a flip up side

tray, as well as our central locking caster system as standard features. The design of the Kadia Luxe helps patients by providing a wider than normal arm cap, for added comfort and functionality, while assisting the caregivers by making the recliner easy to maneuver within the patient room, and since the working components are designed within the arm footprint, it prevents the handle, or the locking caster system, or the tray from interacting with any beds, bedside cabinets, sleep sofas, or doorways, making the unit easier to use and also transfer patients to procedures as well as incorporating the comfort that we are known for.

Manual Hydraulic Lift Exam Treatment Recliner with Dual Patient Transfer Arms/Rema Style » **RC7M62J**.

Manual Hydraulic Lift Exam Treatment Recliner with Dual Patient Transfer Arms/Rema Style » **RC7M62J**.

Power Lift Exam Recliner/Rema Style » **R7P18J**.

Trendelenburg Pedal (Standard)

Manual Hydraulic (top) & Power (lower) Lift Activation Pedal

Exam Lift Treatment Recliner

The Exam Lift Treatment Recliner allows the caregiver to intuitively raise and lower the recliner from seated height to exam height, and stop anywhere in between, while allowing the patient to operate the recliner manually. It comes standard with many important features, and is offered with extensive option combinations to provide the end user a chance to specify the perfect product for their application, available in both manual and power lifting versions at equal cost. There is a ballistic nylon material sewn into the bottom of the arm panel to help protect the chair material from extensive usage of the lift, Trendelenburg, or Quad Locking Caster pedals. The Quad Locking Caster System provides stability when raising a patient for examination, and is standard on all Exam Lift Treatment Recliners.

Exam Lift Activation Pedals

While the Manual Hydraulic Exam Lift Treatment Recliner includes a pedal that is manually pumped to raise the body of the chair (while holding a separate pedal to lower), the Power Lift Exam Treatment Recliner features an Activation Pedal marked with a "+" and a "-" which will raise and lower the recliner when activated by stepping on the pedal. The Activation Pedals are located on both sides of the recliner. The Power Lift Motor features an anti-crush emergency stop, which will halt the motor if an object comes in contact with the chair while it is being lowered back down. The power version also features an auto-off cycle function, to protect the motor. An optional battery backup is available as well.

Kadia Mod Style Sleep Chair & Durable 650 Series Recliner

Our Kadia family of products continues to grow. In addition to the new Kadia Luxe recliner, the modern rectilinear design of the Kadia Mod public area seating series has been adapted to both our Durable® 650 Series of recliners, as well as our three-position pull out sleep chairs.

The Durable® 650 Series is our premier collection of mobile healthcare recliners. Featuring a patented unitized mechanism (extending to a true flatbed position), 650 lb weight capacity, and near limitless option configurations to adapt to any environment, the Durable® 650 Series truly encapsulates our core product values of Comfort, Durability, and Performance to make it a recliner choice trusted by patients and caregivers alike. Engineered from the

ground up with cleanability in mind, its removable back and lift up seat, along with the absence of entrapment areas make it a strong asset in infection control. Our legacy of Comfort combines with a passion for well-being in the Durable® 650 Series to prove beyond doubt- Comfort Heals®.

Our collection of Sleep Chairs offer a three position space saving design, with chair, chaise lounge, and sleep positions all available in a single product. The Sleep Chairs are available in a variety of sizes, including dual chairs with independent right and left chair/sleepers. Most models include the Soft Luxe seat cushion system with Bolsa Coils to provide a peak level of comfort and durability.

Kadia Mod Public Area Seating

The Kadia Mod family of public area seating has been engineered with clean lines, refreshing comfort, enhanced performance, and lifetime durability that you have come to expect from Knú Comfort®. Recently expanded with Upholstered Lounge and Hip Chair variations, Kadia Mod has a passive flex back integrated into the design, which allows for a slightly noticeable minor flexing of the back, which again provides added comfort as a standard. The Kadia Mod family includes integrated “wall saver” leg design, seat clean out, adjustable leveling glides, three standard powder coat frame/leg colors, and unlimited color options available upon request. Urethane and Solid Surface Arm Cap options are available, as well as replaceable components should an update or reconfiguration be needed in the future.

We’ve introduced products in the Kadia Mod style in nearly all of our product categories, including recliners and sleep chairs, which are also complemented by the angled design of our Oxley and Max families of sleep sofas.

Max Sleep Sofa

The Max Series of Sleep Sofas has continued to be one of our fastest growing categories in terms of sales, models, and product enhancements. It is called Max, because it “maximizes” the user experience by providing multiple ways to utilize this product while never growing or expanding from its original footprint. The Max Sleep Sofa with Hydraulic Lift Center Table allows users to sit and have an end table surface at the seated height, and if extended up, users’ legs can fit underneath the table and it can be used as a dining surface, working surface, or to simply enjoy a game of cards with friends or relatives.

The Max Series of Sleep Sofas has many different options to choose from to enhance the performance and comfort of the product, from leg rest extensions, drawers, and locking casters, to power modules and surface materials.
