Kadia Mod Hip Chair

The Knú Feel of Comfort

More than the repose offered by a soft place to rest, Comfort can take meaning in every aspect of our world. It is a force to heal a troubled body, mind, and soul. And it is our passion.

*Each piece of public area lounge and visitor seating in this book was purposefully engineered by the dedicated Knú Comfort® design team, with the clear goal of giving life to our mantra: **Comfort Heals®**.*

KNÚ®

Features at a Glance

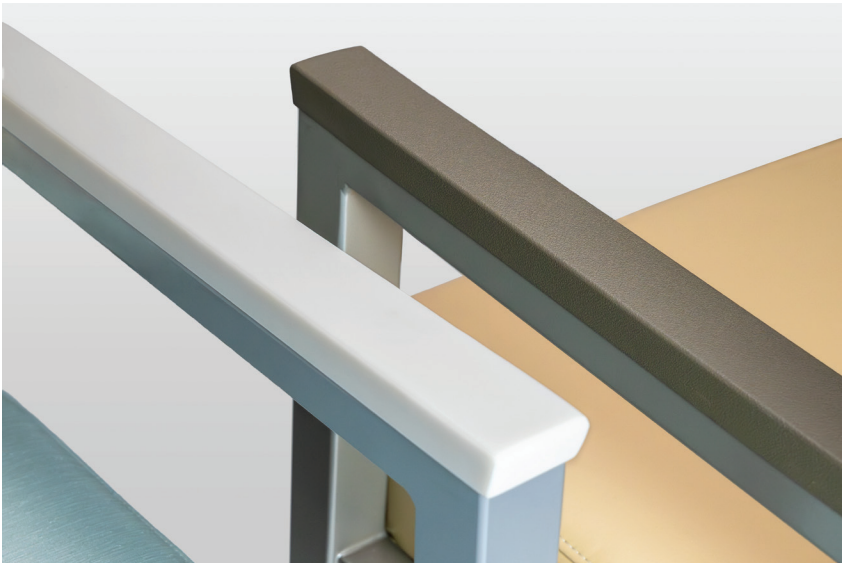

Passive Flex Back

The passive flex back common to the majority of public area seating products by Knú Comfort® is designed to allow a small amount of forward and backward movement of the back cushion. This adds comfort for users as they enter the chair, and permits a gentle rocking motion to soothe as they spend time in a waiting room or lobby setting.

Seat Clean-Out

A seat clean-out, or wipe out area, is a key feature engineered to allow optimum cleanability of public area seating. A small opening between the seat and back cushions allows any debris users may drop to fall straight to the floor where it can be easily swept away. The seat clean-out is standard on all Konzert, Kadia Mod, and Cascade collections of public area seating.

Field Replaceable Parts

Public area seating from Knú Comfort® is engineered from the ground up for maximum durability to withstand 24/7 usage in areas open to the general public. If there is eventual damage done to the product, all parts from arm caps to upholstered seats are designed to be quickly replaced in the field, allowing for minimal downtime and an extended life cycle.

Wall Saver Design

To protect facilities, as well as the product, a wall saver design is incorporated in all metal frame visitor and lounge seating to allow chairs to be fully pushed against a wall, with contact only occurring at the base of the trim. Adjustable glides ensure the chair is level and provides a stable resting spot for users.

Kadia Mod Metal Lounge

Kadia Mod Collection

Metal Visitor | Metal Lounge | Upholstered Lounge | Hip Chair

Kadia Mod is a high performing family of seating products, from metal frame visitor and lounge to easy access hip chairs, all sharing the same modern rectilinear aesthetic. Passive flex back, seat clean-out opening, and a wall saver design make Kadia Mod ideally suited for high-traffic healthcare and commercial spaces.

Kadia Mod Visitor

Kadia Mod Visitor

The Kadia Mod collection of visitor and lounge seating is a perfect match to the Kadia Mod style option available on all Durable® recliner series from La-Z-Boy® Healthcare | Knú Comfort®.

Oxley and Max sleep sofas (pictured above) showcase a modern rectilinear arm profile that complements the Kadia Mod collections of public area seating and recliners. The Kadia Mod style is also available on all size sleep chairs.

Koncert Metal Lounge

Koncert Collection

*Metal Visitor | Metal Lounge | Upholstered Lounge
Hip Chair | Behavioral Health*

The Koncert collection of seating was designed for enhanced performance, durability, and comfort. Spanning metal frame visitor and lounge in several variations, to fully upholstered lounge and behavioral health, Koncert is a comprehensive family of seating engineered to withstand the heaviest use in public commercial and healthcare spaces.

Koncert Metal Lounge

Koncert Hip Chair

The Koncert collection has a coordinating arm profile to the EV, Rema, and Koncert style variations available on the Durable® recliner series from La-Z-Boy® Healthcare | Knú Comfort®, including the Durable® 550 Series Rocker Recliner above.

Also available within the Koncert collection of seating are metal frame and fully upholstered lounge behavioral health chairs, which utilize tamper-proof hardware, a sled base, and an option for additional built-in weight.

Kascade Lounge with 3.5" Arms

Kascade Lounge

Lounge | 3.5" and 8" Arms | Back Rail Option

Kascade Lounge delivers depth and dimension to open plan lounge settings with variations of single, loveseat, and sofas featuring multiple arm widths, boxed back, tapered wood legs, and more. Solid surface or thermofoil arm caps build a rich atmosphere, and in higher education environments can provide a flat space for notepads or laptops—particularly when paired with optional ultra wide 8" arms.

Dalton Lounge Loveseat

Dalton Lounge

Lounge Chair | Loveseat | Sofa

Dalton is a classic, high performing series of upholstered lounge seating designed with comfort at the forefront. Available with fully upholstered arms or any choice of arm caps, along with multiple leg options, Dalton can be dressed to fit any space.

Dalton Lounge

Assymble Lounge with Solid Surface Arm Caps

Assymble Modular Lounge

Lounge Seating | Inside & Outside Corners | Benches | Tables

Complete with a wide array of seating, table, and angled components, along with bench and arm options, Assymble offers limitless configurations to fill any space. From serpentine layouts in open areas to wrapping around columns in tight quarters, Assymble was designed to bring maximum comfort and durability.

Assymble Modular Lounge

Textiles

If a piece of furniture is a canvas, then the textiles covering it are the palette. Knú Comfort® has built longstanding relationships with all major textile vendors serving healthcare and commercial spaces to ensure that palette is comprehensive enough to meet any facility or design professional's vision and budget.

Along with this extensive partner program, Knú Comfort® is able to grade in additional textiles from nearly any outside vendor upon request.

Finishes

The right finish on a piece of furniture can be the accent that makes it "pop", or create the cohesiveness that ties it into a space. Knú Comfort® offers a varied array of choices across solid surface, powder coat, wood, thermofoil, and polyurethane, all selected by popular demand and industry trends to allow a designer's imagination to flourish.

As with textiles, Knú Comfort® works daily with clients and suppliers to bring solid surface, metal, or other finishes that fall outside of the standard collection to projects, allowing full freedom of creativity.
