

Infusion & Oncology

Product Overview

Why choose Durable® Series recliners?

La-Z-Boy® Healthcare | Knú Comfort® has partnered with oncology and infusion centers across the nation, providing healing comfort to patients and caregivers alike. Designed from the ground up for 24/7 healthcare environments, each series of recliners bearing the Durable® name brings unique features to support a wide range of individual needs, while sharing the core set of qualities below.

COMFORT

The top distinguishing factor of Durable® recliners. Sinuous springs in the seat and back, lumbar support, and locking back offer patients superior comfort, while options such as heat/massage, adjustable head rests, and back pads enhance their experience through extended sessions.

ADJUSTABILITY

The extensive level of adjustability enhances comfort for both patient and caregiver. An infinite position back allows any degree of recline, while the foot rest, back, and seat angle on power models can be adjusted precisely to the user's highest level of comfort, including a weightless zero gravity position.

EASE OF CLEANING

Durable® Series recliners were engineered for thorough and efficient sanitization every shift. A quick removable back and lift up seat provide access and visibility to all surfaces, while the base was designed with zero entrapment areas, allowing any spills or debris to fall straight to the floor.

SAFETY

Numerous features are available across the different Durable® series to protect patients, such as central locking caster systems and patient transfer arms. Exam lift and power recliners also reduce caregiver strain by moving patients to the most ergonomic position for the particular attending staff.

Durable® Power Series - ZG Lift Assist Recliner

EXTENSIVE OPTIONS

A full range of add-ons allow Durable® recliners to be tailored to nearly any setting. Healthcare specific accessories such as IV poles and comfort options like heat/massage or USB charging enhance both wellness and patient experience. Many options can even be added in the field, years after purchase.

Cleanability Features Demo

DURABILITY

With weight capacities reaching up to 750 lbs on bariatric models, Durable® recliners are built to last. Field replaceable parts ensure minimal downtime if an issue does occur, as well as extend the product's life cycle.

ACCESSIBILITY

The features distinct to each Durable® recliner series offer a spectrum of customization to cater to the most diverse needs. Multiple caster heights allow adjustments to the seat height, while select Durable® Power Series recliners bring powered lift assist capabilities to help users exit the chair safely.

Heat & Massage

Side Tray, Foley Bag Holder, & USB

Durable® Exam Lift Series Vertical Lifting Healthcare Recliners

A versatile recliner to elevate infusion spaces. Raise patients to caregiver height, improving care and helping reduce potential strain on caregivers.

Exam Lift Recliner

- Powered lift movement to exam/treatment height by caregiver via non-handed foot pedal
- Reduces caregiver strain by positioning patient at ergonomic height
- Central locking caster system & locking leg support for maximum safety & stability
- Standard with Trendelenburg position
- Several back and arm aesthetic styles available
- 650 lb static / 500 lb dynamic weight capacity

ZG Exam Lift Recliner

- Adds top features of the ZG Recliner to Exam Lift Recliner
- Recline functions operated by powered control wand
- Wand preset buttons for common positions, plus precise individual controls for foot rest, back angle, and seat pitch
- Weightless zero gravity position preset takes user to neutral position, reducing pressure points & strain over long sessions

Durable® Power Series Power Mobile Healthcare Recliners

All the signature features of Durable® recliners, now with power operated recline. Zero gravity (ZG) position capability and optional lift assist function further enhance the patient experience.

ZG Recliner

- Recline functions operated by powered control wand
- Wand preset buttons for common positions, plus precise individual controls for foot rest, back angle, and seat pitch
- Weightless zero gravity position preset takes user to neutral position, reducing pressure points & strain over long sessions
- Standard with Trendelenburg position
- Central locking caster system for maximum safety & stability
- Several back and arm aesthetic styles available
- 650 lb static / 500 lb dynamic weight capacity

ZG Lift Assist (Sit to Stand) Recliner

- Expands features of ZG Recliner with Lift Assist functionality to aid users in exiting the chair
- Automatic safety locking caster system secures base any time power recline or lift movement is activated

Durable® 650 & 750 Series

Mobile Healthcare Recliners

The go-to recliners for healthcare settings. Comfort, convenience, and cleanability in sizes ranging from compact to bariatric.

Durable® 650 Series

- Standard (24") and Compact/Pediatric (22") seat widths available
- Patented Durable® recline mechanism eases user into position with smooth, full-body motion
- Locking casters for maximum safety & stability
- Available with Trendelenburg position
- Several back and arm aesthetic styles available
- 650 lb weight capacity

Durable® 750 Series

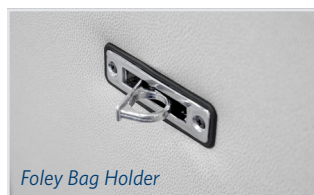

- Same features as Durable 650 Series in bariatric design
- 29" seat width
- 750 lb weight capacity
