

Comfort Without Complexity

From operation to sanitization, EZ Rest lives up to its name. Purposefully engineered for ease of use by guests, caregivers, and staff, EZ Rest promotes intuitive interactions with all who engage with it.

One-Pull Transformation

Designed to maximize ease of use, a simple pull of the handle extends EZ Rest's seat into a full sleep surface, making transitions effortless for families and staff.

In addition to the benefits for users, the simple yet durable elevated slide-out mechanism utilized by EZ Rest alleviates the need for any support wheels connecting the seat movement to the floor—preventing scuffs or tracks developing along the floor due to frequent use.

Simply Customizable

In healthcare spaces, flexibility matters. From multiple seat widths to a range of arm styles, including the new barrel arm, EZ Rest is designed to adapt to the visual and spatial requirements of virtually any environment without compromising ease of use.

Arm styles can be mixed and matched to fit aesthetic or spatial needs. The "open" arm sits flush with the seat, both opening the sitting space up and extending the usable sleep area.

A selection of finishes across thermofoil, urethane, and solid surface arm cap materials¹ complement thousands of healthcare grade textile choices for a cohesive, design-forward solution.

Lounge Arm (left side) and Open Arm (right side)

Overnight Comfort, Made Easy

Meet EZ Rest, the newest addition to Knú® Healthcare's line of patient room sleep sofas. Designed for ease of use, a simple pull of the handle extends the seat into a full sleep surface, making transitions effortless for families and staff. Multiple seat widths and arm styles, including the new barrel arm, provide flexibility to fit a range of spaces without sacrificing style. Clean-out openings

where the seat meets the back and arms support easy cleaning, while field-replaceable components ensure long-term performance. A dual locking caster system enhances safety, and the hospital grade power option keeps devices charged throughout long stays. Crafted for today's healthcare spaces, EZ Rest delivers comfort, performance, and durability in a clean, user-friendly design.

Comfort in the Details

Behind its simple operation and modern style, EZ Rest hides a range of thoughtful features designed to enhance user experience and caregiver satisfaction. From hospital grade power to a dual locking caster system, EZ Rest offers the comfort, convenience, and safety required for today's healthcare environments.

Built to Last

Engineered for 24/7 healthcare environments, a 900 lb weight rating and field replaceable parts extend the EZ Rest Sleep Sofa's life cycle while minimizing downtime.

Clean-Out Openings

Clean-out gaps are integrated where the seat meets the back and arms, ensuring that any spills or debris fall directly to the floor to be easily wiped away.

Arm Caps

A mix of solid surface, urethane, and thermofoil arm caps are available (varying by arm style).

Hospital Grade Power

Visitors can keep their devices charged with the optional hospital grade USB-C/USB-A/120 V outlet.

Dual Locking Casters

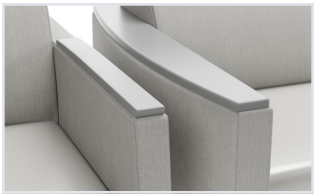

Each arm is equipped with a lock pedal that secures both casters on that side. Pedal placement inside of the arm maintains a minimal footprint and allows access in tight spaces.

Space Conscious

The elevated seat design opens space under the sofa for storage and ease of cleaning, while also avoiding the use of support wheels skidding on the floor during each use.

Easy & Intuitive Sleeper

A simple pull of the handle extends the seat into a full sleep surface, making transitions easy for families and staff.

Arm Styles

Each of the four arm styles can be mixed and matched to meet spacial and functional needs, from lounge or barrel style arms to the 3.5" straight arm or open arm.

A Custom Fit

Two standard seat widths, 68" and 76", along with multiple arm widths that can be mixed and matched allow EZ Rest to be customized to fit your specific space.
