

EZ Rest Sleep Sofa

Comfort Made Easy

Behind its simple operation and modern style, EZ Rest hides a range of thoughtful features designed to enhance user experience and caregiver satisfaction. From hospital grade power to dual locking caster system, EZ Rest offers the comfort, convenience, and safety required for today's healthcare environments.

Arm Caps

Solid surface arm caps are available on all models, along with urethane on 3.5" straight arms and thermofoil on barrel style arms.

Arm Styles

A straight 3.5" wide arm and barrel style arm can be mixed and matched to meet spacial and functional needs.

Dual Locking Casters

Each arm is equipped with a lock pedal that secures both casters on that side. Placement inside of the arm maintains a minimal footprint and allows access in tight spaces.

A Custom Fit

Two standard seat widths, 68" and 76", along with multiple arm widths that can be mixed and matched allow EZ Rest to be customized to fit your specific space.

Clean-Out Openings

Clean-out gaps are integrated where the seat meets the back and arms, ensuring that any spills or debris fall directly to the floor to be easily wiped away.

Built to Last

Engineered for 24/7 healthcare environments, a 900 lb weight rating and field replaceable parts extend the EZ Rest Sleep Sofa's life cycle while minimizing downtime.

Hospital Grade Power

Visitors can keep their devices charged with the optional hospital grade USB-C/USB-A/120 V outlet.

Space Conscious

The elevated seat design opens space under the sofa for storage and ease of cleaning, while also operating without the use of wheels skidding on the floor during each use.

Easy & Intuitive Sleeper

A simple pull of the handle extends the seat into a full sleep surface, making transitions easy for families and staff.
