Swing-Away Series

KNÜ®
HEALTHCARE

Comfort & Cleanability, in Full Swing

Designed for Patients AND Staff

The Swing-Away Series by Knú Healthcare is designed for treatment environments where cleanability and frequent sanitization are essential. A quick-removable back, lift-up seat, and arms that swing open a full 180° provide easier access for cleaning, without compromising comfort or performance.

Comfort in the Details

The recliners in the Swing-Away Series have been meticulously designed to meet the needs of patients, caregivers, and healthcare facilities at large, all while providing the highest level of comfort, performance, and cleanability.

Crafted for Cleaning
Swing-Away Series recliners feature a quick-removable back and lift-up seat that can open up access to the recliner in seconds, no tools required.

Sized to Fit
The Swing-Away Series offers 24″ standard and 29″ bariatric seat widths, with weight capacities of 500 lbs and 700 lbs, respectively.

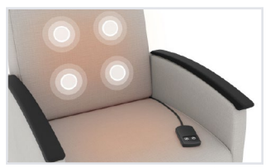
Outside of left (facing) arm

Cable Release Leg Rest
A simple pull of the left side (facing) lever extends the leg rest via a newly redesigned cable release system built for performance and ease of use.

Infinite Position Back
The back adjusts to any angle to support personalized comfort, and is secured in place with the locking lever on the outside of the right (facing) arm.

Dialysis-Focused Side Tray
Developed to meet the specific needs of dialysis spaces, this new tray option folds flush against the arm to help prevent lines, cords, or tubing from becoming caught in the gap.

Swing-Away Arms
The defining feature of the Swing-Away Series, both arms can swing open a full 180° to allow thorough cleaning of surfaces inaccessible on most recliners.



Heat & massage with wand controls

Expansive Options
Healthcare options such as Foley bag holders and comfort/convenience features like heat and massage or USB charging enhance both wellness and patient experience.

Central lock & steer caster system

Swing Arm Lock Pedal
A locking foot pedal keeps each arm secure while the recliner is occupied by a patient. Pressing the pedal allows the arm to swing open for extensive cleaning.

Mechanism Guard
A guard plate conceals the internal recline mechanism on both sides and helps keep hands clear of moving parts while cleaning is in progress.

Trendelenburg Pedal
Trendelenburg position capability is standard on the Swing-Away Series, allowing the seat and back to tilt so the occupant's feet and legs are higher than their head.

MADE IN THE USA

Swing-Away Series by Knú® Healthcare

Cleanability is Key

The Swing-Away Series is purpose-built for high-use treatment environments such as dialysis and infusion, where furniture must withstand frequent use along with rigorous cleaning and sanitization protocols. Designed with these demanding spaces in mind, the series supports efficient cleaning, accessibility, and long-term durability without compromising comfort.

Cleaning Features

- **180° swing-away arms** for easier access to hard-to-reach surfaces
- **Lift-up seat** for quick access beneath the seating area
- **Quick-removable back** for easier cleaning of hidden surfaces
- **Clean-out gap** for improved access around the seat and arm base
- **Mechanism guard** to help avoid contact with internal parts
